

## Program 3rd International Conference on Physiotherapy in Oncology, September 14, 2023

Time		Topic		
08:15 - 09:00		REGISTRATION		
		Opening & Welcome		
09:00 - 09:10		prof. Kristin Campbell, PT, PhD - Program Chair		
09:10 - 09:30		Keynote: Trends and patterns in cancer & care		
		prof. Thijs Merkx, MD, DMD, PhD (Netherlands)		
		Keynote: How to screen and triage - models & approaches		
09:30 - 10:15		Mackenzie Pergolotti, OTR/L, PhD, MS (USA)		
10:15 - 10:45		BREAK		
10:45 - 12:00		FC	DCUSED SYMPOSIA - ROUND 1	
		Service delivery - Screening & triage for exercise     programming	Advances in lymphedema management - Two approaches to the same problem?	Pain education for people living beyond breast cancer: state-of-the-art and new digital tools
	10:30 - 10:35	programming Introduction	Introduction	Introduction
Slot 1	10:35 - 10:55	Over 2000 people screened & triaged: What we learn by delivering the ACE	Prospective surveillance for breast cancer-related arm lymphedema	Personalized, biopsychosocial pain care for cancer patients with
		program  prof. Margaret McNeely, PT, PhD (Canada)	(10:20-10:45) Bolette Skjødt Rafn, PT, PhD (Denmark)	persistent pain prof. An De Groef, PT, PhD (Belgium)
		SafeFit: Importance of a team as part of screening for virtual exercise	Prophylactic use of compression sleeves for reducing arm swelling in	Modifying contemporary Pain Science Education (PSE) to cancer
Slot 2	10:55 - 11:15	programming	women at high risk of breast cancer-related lymphedema (10:45-11:10)	populations
		prof. Anna Campbell, MBE (UK)	Vincent Paramanandam, PT, PhD (India)	Lore Dams, PT, PhD (Belgium)  Demonstration of an app-based, personalized eHealth self-management
Slot 3	11:15 - 11:35	Implementing cancer screening & exercise as integral part of cancer care		support program for pain after cancer
		Anouk Hiensch, epidemiologist, PhD (Netherlands)	Panel discussion (11:10-11:30)	prof. An De Groef & Lore Dams (Belgium)
	11:35 - 11:45	Panel discussion		Panel discussion
11:45 - 13:00		LUNCH BREAK & POSTER VIEWING & EXPO		
		NETWORKING (12:15 - 12:45)		
13:00 - 13:45		<b>Keynote:</b> Health disparities: how to address them in our physiotherapy practice and research		
10.00		prof. Lisa VanHoose, PT, PhD, MPH (USA)		
13:45 - 15:00			FOCUSED SYMPOSIA - ROUND 2	
			TOOCOLD OTHER CONT. INCOME 2	
		4. Service delivery - Virtual care for cancer patients	5. Cancer-related fatigue: Active management,	Addressing the rehabilitation and exercise needs of adolescents and young adults with cancer
	13:45 - 13:50			Addressing the rehabilitation and exercise needs of adolescents and young adults with cancer  Introduction
Slot 1	13:45 - 13:50 13:50 - 14:10	4. Service delivery - Virtual care for cancer patients	5. Cancer-related fatigue: Active management, but how?	adolescents and young adults with cancer
Slot 1		Service delivery - Virtual care for cancer patients     Introduction	5. Cancer-related fatigue: Active management, but how?  Introduction	adolescents and young adults with cancer
Slot 1		Service delivery - Virtual care for cancer patients     Introduction  Testing physical activity and fitness remotely: feasibility and clinical value	S. Cancer-related fatigue: Active management, but how?     Introduction  Targeted exercise as effective intervention for cancer-related fatigue	adolescents and young adults with cancer Introduction  Rehabilitation needs of adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  Barriers to oncology rehabilitation experienced by adolescents and
	13:50 - 14:10	A. Service delivery - Virtual care for cancer patients	S. Cancer-related fatigue: Active management, but how?     Introduction  Targeted exercise as effective intervention for cancer-related fatigue Nicole Stout, DPT, CLT-LANA, FAPTA (USA)  Rebuilding energy reserves in patients with cancer-related fatigue Annemarieke Fleming, Reg. health psychologist, MSc, PMSc	adolescents and young adults with cancer Introduction  Rehabilitation needs of adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)
	13:50 - 14:10	4. Service delivery - Virtual care for cancer patients  Introduction  Testing physical activity and fitness remotely: feasibility and clinical value  Laurien Buffart, movement scientist, PhD (Netherlands)  ReStOre@Home Cancer Rehabilitation  Emer Guinan, PT, PhD (Ireland)	S. Cancer-related fatigue: Active management, but how?     Introduction  Targeted exercise as effective intervention for cancer-related fatigue Nicole Stout, DPT, CLT-LANA, FAPTA (USA)  Rebuilding energy reserves in patients with cancer-related fatigue Annemarieke Fleming, Reg. health psychologist, MSc, PMSc (Netherlands)	adolescents and young adults with cancer Introduction  Rehabilitation needs of adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  Barriers to oncology rehabilitation experienced by adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  How to engage adolescents and young adults in implementing exercise
Slot 2	13:50 - 14:10 14:10 - 14:30	4. Service delivery - Virtual care for cancer patients  Introduction  Testing physical activity and fitness remotely: feasibility and clinical value  Laurien Buffart, movement scientist, PhD (Netherlands)  ReStOre@Home Cancer Rehabilitation  Emer Guinan, PT, PhD (Ireland)  Lessons learned from 10 years of telerehabilitation interventions	S. Cancer-related fatigue: Active management, but how?     Introduction  Targeted exercise as effective intervention for cancer-related fatigue Nicole Stout, DPT, CLT-LANA, FAPTA (USA)  Rebuilding energy reserves in patients with cancer-related fatigue Annemarieke Fleming, Reg. health psychologist, MSc, PMSc (Netherlands)  "Untire": a digital help to conquer cancer-related fatigue	adolescents and young adults with cancer Introduction  Rehabilitation needs of adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  Barriers to oncology rehabilitation experienced by adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  How to engage adolescents and young adults in implementing exercise and oncology rehabilitation into long term survivorship
Slot 2	13:50 - 14:10 14:10 - 14:30	4. Service delivery - Virtual care for cancer patients  Introduction  Testing physical activity and fitness remotely: feasibility and clinical value  Laurien Buffart, movement scientist, PhD (Netherlands)  ReStOre@Home Cancer Rehabilitation  Emer Guinan, PT, PhD (Ireland)	S. Cancer-related fatigue: Active management, but how?     Introduction  Targeted exercise as effective intervention for cancer-related fatigue Nicole Stout, DPT, CLT-LANA, FAPTA (USA)  Rebuilding energy reserves in patients with cancer-related fatigue Annemarieke Fleming, Reg. health psychologist, MSc, PMSc (Netherlands)	adolescents and young adults with cancer Introduction  Rehabilitation needs of adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  Barriers to oncology rehabilitation experienced by adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  How to engage adolescents and young adults in implementing exercise
Slot 2	13:50 - 14:10 14:10 - 14:30 14:30 - 14:50	4. Service delivery - Virtual care for cancer patients  Introduction  Testing physical activity and fitness remotely: feasibility and clinical value  Laurien Buffart, movement scientist, PhD (Netherlands)  ReStOre@Home Cancer Rehabilitation  Emer Guinan, PT, PhD (Ireland)  Lessons learned from 10 years of telerehabilitation interventions  Irene Cantarero-Villanueva, PT, PhD (Spain)	S. Cancer-related fatigue: Active management, but how?     Introduction  Targeted exercise as effective intervention for cancer-related fatigue Nicole Stout, DPT, CLT-LANA, FAPTA (USA)  Rebuilding energy reserves in patients with cancer-related fatigue Annemarieke Fleming, Reg. health psychologist, MSc, PMSc (Netherlands)  'Untire': a digital help to conquer cancer-related fatigue Maaike Brugmans, PT, MSc (Netherlands)	adolescents and young adults with cancer Introduction  Rehabilitation needs of adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  Barriers to oncology rehabilitation experienced by adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  How to engage adolescents and young adults in implementing exercise and oncology rehabilitation into long term survivorship Lauren Corke, MSc candidate (Canada)
Slot 2	13:50 - 14:10 14:10 - 14:30 14:30 - 14:50	4. Service delivery - Virtual care for cancer patients  Introduction  Testing physical activity and fitness remotely: feasibility and clinical value Laurien Buffart, movement scientist, PhD (Netherlands)  ReStOre@Home Cancer Rehabilitation  Emer Guinan, PT, PhD (Ireland)  Lessons learned from 10 years of telerehabilitation interventions  Irene Cantarero-Villanueva, PT, PhD (Spain)  Panel discussion	S. Cancer-related fatigue: Active management, but how?     Introduction  Targeted exercise as effective intervention for cancer-related fatigue Nicole Stout, DPT, CLT-LANA, FAPTA (USA)  Rebuilding energy reserves in patients with cancer-related fatigue Annemarieke Fleming, Reg. health psychologist, MSc, PMSc (Netherlands)  'Untire': a digital help to conquer cancer-related fatigue Maaike Brugmans, PT, MSc (Netherlands)	adolescents and young adults with cancer Introduction  Rehabilitation needs of adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  Barriers to oncology rehabilitation experienced by adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  How to engage adolescents and young adults in implementing exercise and oncology rehabilitation into long term survivorship Lauren Corke, MSc candidate (Canada)
Slot 2	13:50 - 14:10 14:10 - 14:30 14:30 - 14:50	4. Service delivery - Virtual care for cancer patients  Introduction  Testing physical activity and fitness remotely: feasibility and clinical value Laurien Buffart, movement scientist, PhD (Netherlands)  ReStOre@Home Cancer Rehabilitation  Emer Guinan, PT, PhD (Ireland)  Lessons learned from 10 years of telerehabilitation interventions  Irene Cantarero-Villanueva, PT, PhD (Spain)  Panel discussion	S. Cancer-related fatigue: Active management, but how?     Introduction  Targeted exercise as effective intervention for cancer-related fatigue Nicole Stout, DPT, CLT-LANA, FAPTA (USA)  Rebuilding energy reserves in patients with cancer-related fatigue Annemarieke Fleming, Reg. health psychologist, MSc, PMSc (Netherlands)  'Untire': a digital help to conquer cancer-related fatigue Maaike Brugmans, PT, MSc (Netherlands)	adolescents and young adults with cancer Introduction  Rehabilitation needs of adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  Barriers to oncology rehabilitation experienced by adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  How to engage adolescents and young adults in implementing exercise and oncology rehabilitation into long term survivorship Lauren Corke, MSc candidate (Canada)
Slot 2 Slot 3	13:50 - 14:10 14:10 - 14:30 14:30 - 14:50	4. Service delivery - Virtual care for cancer patients  Introduction  Testing physical activity and fitness remotely: feasibility and clinical value Laurien Buffart, movement scientist, PhD (Netherlands)  ReStOre@Home Cancer Rehabilitation  Emer Guinan, PT, PhD (Ireland)  Lessons learned from 10 years of telerehabilitation interventions  Irene Cantarero-Villanueva, PT, PhD (Spain)  Panel discussion  BREAK	5. Cancer-related fatigue: Active management, but how? Introduction  Targeted exercise as effective intervention for cancer-related fatigue Nicole Stout, DPT, CLT-LANA, FAPTA (USA)  Rebuilding energy reserves in patients with cancer-related fatigue Annemarieke Fleming, Reg. health psychologist, MSc, PMSc (Netherlands)  "Untire": a digital help to conquer cancer-related fatigue Maaike Brugmans, PT, MSc (Netherlands)  Panel discussion  8. Selected poster presentations (15 min each)	adolescents and young adults with cancer Introduction  Rehabilitation needs of adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  Barriers to oncology rehabilitation experienced by adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  How to engage adolescents and young adults in implementing exercise and oncology rehabilitation into long term survivorship Lauren Corke, MSc candidate (Canada)
Slot 2  Slot 3  15:00 -15:30  15:30-16:45	13:50 - 14:10 14:10 - 14:30 14:30 - 14:50 14:50 - 15:00	4. Service delivery - Virtual care for cancer patients  Introduction  Testing physical activity and fitness remotely: feasibility and clinical value Laurien Buffart, movement scientist, PhD (Netherlands)  ReStOre@Home Cancer Rehabilitation Emer Guinan, PT, PhD (Ireland)  Lessons learned from 10 years of telerehabilitation interventions Irene Cantarero-Villanueva, PT, PhD (Spain)  Panel discussion  BREAK  7. Advanced cancer: Where does rehabilitation fit?	5. Cancer-related fatigue: Active management, but how? Introduction  Targeted exercise as effective intervention for cancer-related fatigue Nicole Stout, DPT, CLT-LANA, FAPTA (USA)  Rebuilding energy reserves in patients with cancer-related fatigue Annemarieke Fleming, Reg. health psychologist, MSc, PMSc (Netherlands)  "Untire": a digital help to conquer cancer-related fatigue Maaike Brugmans, PT, MSc (Netherlands)  Panel discussion  8. Selected poster presentations (15 min each)	adolescents and young adults with cancer Introduction  Rehabilitation needs of adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  Barriers to oncology rehabilitation experienced by adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  How to engage adolescents and young adults in implementing exercise and oncology rehabilitation into long term survivorship Lauren Corke, MSc candidate (Canada)
Slot 2 Slot 3	13:50 - 14:10 14:10 - 14:30 14:30 - 14:50 14:50 - 15:00	4. Service delivery - Virtual care for cancer patients  Introduction  Testing physical activity and fitness remotely: feasibility and clinical value Laurien Buffart, movement scientist, PhD (Netherlands)  ReStOre@Home Cancer Rehabilitation Emer Guinan, PT, PhD (Ireland)  Lessons learned from 10 years of telerehabilitation interventions Irene Cantarero-Villanueva, PT, PhD (Spain)  Panel discussion  BREAK  7. Advanced cancer: Where does rehabilitation fit?  Introduction  Palliative rehab: What is this & how to leverage PT resources to provide it Joanne Bayly, PT, PhD (UK)	5. Cancer-related fatigue: Active management, but how?  Introduction  Targeted exercise as effective intervention for cancer-related fatigue Nicole Stout, DPT, CLT-LANA, FAPTA (USA)  Rebuilding energy reserves in patients with cancer-related fatigue Annemarieke Fleming, Reg. health psychologist, MSc, PMSc (Neitherlands)  "Untire": a digital help to conquer cancer-related fatigue Maaike Brugmans, PT, MSc (Netherlands)  Panel discussion  8. Selected poster presentations (15 min each)  Introduction  Slot 1 (15:35 - 15:50) PERCS cancer rehabilitation triage and referral	adolescents and young adults with cancer Introduction  Rehabilitation needs of adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  Barriers to oncology rehabilitation experienced by adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  How to engage adolescents and young adults in implementing exercise and oncology rehabilitation into long term survivorship Lauren Corke, MSc candidate (Canada)
Slot 2  Slot 3  15:00 -15:30  15:30-16:45	13:50 - 14:10 14:10 - 14:30 14:30 - 14:50 14:50 - 15:00	4. Service delivery - Virtual care for cancer patients  Introduction  Testing physical activity and fitness remotely: feasibility and clinical value Laurien Buffart, movement scientist, PhD (Netherlands)  ReStOre@Home Cancer Rehabilitation Emer Guinan, PT, PhD (Ireland)  Lessons learned from 10 years of telerehabilitation interventions Irene Cantarero-Villanueva, PT, PhD (Spain)  Panel discussion  BREAK  7. Advanced cancer: Where does rehabilitation fit?  Introduction  Palliative rehab: What is this & how to leverage PT resources to provide it	5. Cancer-related fatigue: Active management, but how? Introduction  Targeted exercise as effective intervention for cancer-related fatigue Nicole Stout, DPT, CLT-LANA, FAPTA (USA)  Rebuilding energy reserves in patients with cancer-related fatigue Annemarieke Fleming, Reg. health psychologist, MSc, PMSc (Netherlands)  'Untire': a digital help to conquer cancer-related fatigue Maaike Brugmans, PT, MSc (Netherlands)  Panel discussion  8. Selected poster presentations (15 min each)  Introduction  Slot 1 (15:35 - 15:50) PERCS cancer rehabilitation triage and referral system: initial feasibility findings from a physiotherapy-led clinic	adolescents and young adults with cancer Introduction  Rehabilitation needs of adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  Barriers to oncology rehabilitation experienced by adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  How to engage adolescents and young adults in implementing exercise and oncology rehabilitation into long term survivorship Lauren Corke, MSc candidate (Canada)
Slot 2  Slot 3  15:00 -15:30  15:30-16:45  Slot 1  Slot 2	13:50 - 14:10 14:10 - 14:30 14:30 - 14:50 14:50 - 15:00 15:30 - 15:35 15:35 - 16:15	4. Service delivery - Virtual care for cancer patients  Introduction  Testing physical activity and fitness remotely: feasibility and clinical value Laurien Buffart, movement scientist, PhD (Netherlands)  ReStOre@Home Cancer Rehabilitation Emer Guinan, PT, PhD (Ireland)  Lessons learned from 10 years of telerehabilitation interventions Irene Cantarero-Villanueva, PT, PhD (Spain)  Panel discussion  BREAK  7. Advanced cancer: Where does rehabilitation fit?  Introduction  Palliative rehab: What is this & how to leverage PT resources to provide it  Joanne Bayly, PT, PhD (UK)  Exercise for people with advanced breast cancer: What do European people living with advanced cancer think?  Martijn Stuiver, PT, PhD (Netherlands)  Adapting daily activities for declining function and quality of life: How to build	S. Cancer-related fatigue: Active management, but how?     Introduction  Targeted exercise as effective intervention for cancer-related fatigue Nicole Stout, DPT, CLT-LANA, FAPTA (USA)  Rebuilding energy reserves in patients with cancer-related fatigue Annemarieke Fleming, Reg. health sychologist, MSc, PMSc (Neitherlands)  "Untire": a digital help to conquer cancer-related fatigue Maaike Brugmans, PT, MSc (Netherlands)  Panel discussion  8. Selected poster presentations (15 min each)  Introduction  Slot 1 (15:35 - 15:50) PERCS cancer rehabilitation triage and referral system: initial feasibility findings from a physiotherapy-led clinic  Louise Brennan, PT, PhD (Ireland)  Slot 2 (15:50 - 16:05) Agreement between a mobile app and face-to-face method to assess persistent pain in a cancer population.	adolescents and young adults with cancer Introduction  Rehabilitation needs of adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  Barriers to oncology rehabilitation experienced by adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  How to engage adolescents and young adults in implementing exercise and oncology rehabilitation into long term survivorship Lauren Corke, MSc candidate (Canada)
Slot 2  Slot 3  15:00 -15:30  15:30-16:45  Slot 1	13:50 - 14:10 14:10 - 14:30 14:30 - 14:50 14:50 - 15:00 15:30 - 15:35 15:35 - 15:55	4. Service delivery - Virtual care for cancer patients  Introduction  Testing physical activity and fitness remotely: feasibility and clinical value Laurien Buffart, movement scientist, PhD (Netherlands)  ReStOre@Home Cancer Rehabilitation Emer Guinan, PT, PhD (Ireland)  Lessons learned from 10 years of telerehabilitation interventions Irene Cantarero-Villanueva, PT, PhD (Spain)  Panel discussion  BREAK  7. Advanced cancer: Where does rehabilitation fit?  Introduction  Palliative rehab: What is this & how to leverage PT resources to provide it Joanne Bayly, PT, PhD (UK)  Exercise for people with advanced breast cancer: What do European people living with advanced cancer think?  Martijn Stuiver, PT, PhD (Netherlands)	Sict 1 (15:35 - 15:50) PERCS cancer rehabilitation triage and referral system: initial feasibility findings from a physiotherapy-led clinic Louise Brennan, PT, PhD (Ireland)  Slot 2 (15:50 - 16:05) Agreement between a mobile app and face-to-face method to assess persistent pain in a cancer population.  A validation study Carolina Fernández Lao, PT, PhD (Spain)	adolescents and young adults with cancer Introduction  Rehabilitation needs of adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  Barriers to oncology rehabilitation experienced by adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  How to engage adolescents and young adults in implementing exercise and oncology rehabilitation into long term survivorship Lauren Corke, MSc candidate (Canada)
Slot 2  Slot 3  15:00 -15:30  15:30-16:45  Slot 1  Slot 2  Slot 3	13:50 - 14:10 14:10 - 14:30 14:30 - 14:50 14:50 - 15:00 15:30 - 15:35 15:35 - 16:15 16:15 - 16:35	4. Service delivery - Virtual care for cancer patients  Introduction  Testing physical activity and fitness remotely: feasibility and clinical value Laurien Buffart, movement scientist, PhD (Netherlands)  ReStOre@Home Cancer Rehabilitation Emer Guinan, PT, PhD (Ireland)  Lessons learned from 10 years of telerehabilitation interventions Irene Cantarero-Villanueva, PT, PhD (Spain)  Panel discussion  BREAK  7. Advanced cancer: Where does rehabilitation fit?  Introduction  Palliative rehab: What is this & how to leverage PT resources to provide it  Joanne Bayly, PT, PhD (UK)  Exercise for people with advanced breast cancer: What do European people living with advanced cancer think?  Martijn Stuiver, PT, PhD (Netherlands)  Adapting daily activities for declining function and quality of life: How to build flexibility into your practice  Mackenzi Pergolotti, OTR/L, PhD, MS (USA)	Siot 1 (15:35 - 15:50) PERCS cancer rehabilitation triage and referral system: initial feasibility findings from a physiotherapy-led clinic Louise Brennan, PT, PhD (Ireland)  Siot 2 (15:50 - 16:05) Agreement between a mobile app and face-to-face method to assess persistent pain in a cancer population.  Siot 3 (16:05 - 16:20) Balance impairments in pediatric cancer Emily McCarthy, DPT (USA)  Siot 4 (16:20 - 16:35) PFRESD Balance impairments in pediatric cancer Emily McCarthy, DPT (USA)  Siot 4 (16:20 - 16:35) PFRESD Balance impairments in pediatric cancer Emily McCarthy, DPT (USA)  Siot 4 (16:20 - 16:35) PFRebabilitation in esophageal cancer care: what	adolescents and young adults with cancer Introduction  Rehabilitation needs of adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  Barriers to oncology rehabilitation experienced by adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  How to engage adolescents and young adults in implementing exercise and oncology rehabilitation into long term survivorship Lauren Corke, MSc candidate (Canada)
Slot 2  Slot 3  15:00 -15:30  15:30-16:45  Slot 1  Slot 2	13:50 - 14:10 14:10 - 14:30 14:30 - 14:50 14:50 - 15:00 15:30 - 15:35 15:35 - 16:15	4. Service delivery - Virtual care for cancer patients  Introduction  Testing physical activity and fitness remotely: feasibility and clinical value Laurien Buffart, movement scientist, PhD (Netherlands)  ReStOre@Home Cancer Rehabilitation Emer Guinan, PT, PhD (Ireland)  Lessons learned from 10 years of telerehabilitation interventions Irene Cantarero-Villanueva, PT, PhD (Spain)  Panel discussion  BREAK  7. Advanced cancer: Where does rehabilitation fit?  Introduction  Palliative rehab: What is this & how to leverage PT resources to provide it Joanne Bayly, PT, PhD (UK)  Exercise for people with advanced breast cancer: What do European people living with advanced cancer think?  Martijn Stuiver, PT, PhD (Netherlands)  Adapting daily activities for declining function and quality of life: How to build flexibility into your practice	5. Cancer-related fatigue: Active management, but how?  Introduction  Targeted exercise as effective intervention for cancer-related fatigue Nicole Stout, DPT, CLT-LANA, FAPTA (USA)  Rebuilding energy reserves in patients with cancer-related fatigue Annemarieke Fleming, Reg. health psychologist, MSc, PMSc (Netherlands)  "Untire": a digital help to conquer cancer-related fatigue Maaike Brugmans, PT, MSc (Netherlands)  Panel discussion  8. Selected poster presentations (15 min each)  Introduction  Slot 1 (15:35 - 15:50) PERCS cancer rehabilitation triage and referral system: initial feasibility findings from a physiotherapy-led clinic Louise Brennan, PT, PhD (Ireland)  Slot 2 (15:50 - 16:05) Agreement between a mobile app and face-to-face method to assess persistent pain in a cancer population. A validation study Carolina Fernández Lao, PT, PhD (Spain)  Slot 3 (16:05 - 16:20) Balance impairments in pediatric cancer	adolescents and young adults with cancer Introduction  Rehabilitation needs of adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  Barriers to oncology rehabilitation experienced by adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  How to engage adolescents and young adults in implementing exercise and oncology rehabilitation into long term survivorship Lauren Corke, MSc candidate (Canada)
Slot 2  Slot 3  15:00 -15:30  15:30-16:45  Slot 1  Slot 2  Slot 3	13:50 - 14:10 14:10 - 14:30 14:30 - 14:50 14:50 - 15:00 15:30 - 15:35 15:35 - 16:15 16:15 - 16:35	4. Service delivery - Virtual care for cancer patients  Introduction  Testing physical activity and fitness remotely: feasibility and clinical value Laurien Buffart, movement scientist, PhD (Netherlands)  ReStOre@Home Cancer Rehabilitation Emer Guinan, PT, PhD (Ireland)  Lessons learned from 10 years of telerehabilitation interventions Irene Cantarero-Villanueva, PT, PhD (Spain)  Panel discussion  BREAK  7. Advanced cancer: Where does rehabilitation fit?  Introduction  Palliative rehab: What is this & how to leverage PT resources to provide it  Joanne Bayly, PT, PhD (UK)  Exercise for people with advanced breast cancer: What do European people living with advanced cancer think?  Martijn Stuiver, PT, PhD (Netherlands)  Adapting daily activities for declining function and quality of life: How to build flexibility into your practice  Mackenzi Pergolotti, OTR/L, PhD, MS (USA)  Panel discussion  Keynote: Implementation of exercise in cancer care: do the benefits outweigh	S. Cancer-related fatigue: Active management, but how? Introduction  Targeted exercise as effective intervention for cancer-related fatigue Nicole Stout, DPT, CLT-LANA, FAPTA (USA)  Rebuilding energy reserves in patients with cancer-related fatigue Annemarieke Fleming, Reg. health psychologist, MSc, PMSc (Netherlands)  "Untire": a digital help to conquer cancer-related fatigue Maaike Brugmans, PT, MSc (Netherlands)  Panel discussion  8. Selected poster presentations (15 min each) Introduction  Slot 1 (15:35 - 15:50) PERCS per physiotherapy-led clinic Louise Brennan, PT, PhD (Ireland)  Slot 2 (15:50 - 16:05) Agreement between a mobile app and face-to-face middation study Carolina Fernández Lao, PT, PhD (Spain)  Slot 3 (16:05 - 16:20) Balance impairments in pedilatric cancer Emily McCarthy, DPT (USA)  Slot 4 (16:20 - 16:35) Prehabilitation in esophageal cancer care: what moves the patient? Elja Reijneveld, PT, MSc (Netherlands)	adolescents and young adults with cancer Introduction  Rehabilitation needs of adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  Barriers to oncology rehabilitation experienced by adolescents and young adults living with cancer Scott Capozza, PT, MS (USA)  How to engage adolescents and young adults in implementing exercise and oncology rehabilitation into long term survivorship Lauren Corke, MSc candidate (Canada)
Slot 2  Slot 3  15:00 -15:30  15:30-16:45  Slot 1  Slot 2  Slot 3	13:50 - 14:10 14:10 - 14:30 14:30 - 14:50 14:50 - 15:00 15:30 - 15:35 15:35 - 16:15 16:15 - 16:35	4. Service delivery - Virtual care for cancer patients  Introduction  Testing physical activity and fitness remotely: feasibility and clinical value Laurien Buffart, movement scientist, PhD (Netherlands)  ReStOre@Home Cancer Rehabilitation Emer Guinan, PT, PhD (Ireland)  Lessons learned from 10 years of telerehabilitation interventions Irene Cantarero-Villanueva, PT, PhD (Spain)  Panel discussion  BREAK  7. Advanced cancer: Where does rehabilitation fit?  Introduction  Palliative rehab: What is this & how to leverage PT resources to provide it Joanne Bayly, PT, PhD (UK)  Exercise for people with advanced breast cancer: What do European people living with advanced cancer think?  Martijn Stulver, PT, PhD (Netherlands)  Adapting daily activities for declining function and quality of life: How to build flexibility into your practice Mackenzi Pergolotti, OTR/L, PhD, MS (USA)	S. Cancer-related fatigue: Active management, but how? Introduction  Targeted exercise as effective intervention for cancer-related fatigue Nicole Stout, DPT, CLT-LANA, FAPTA (USA)  Rebuilding energy reserves in patients with cancer-related fatigue Annemarieke Fleming, Reg. health psychologist, MSc, PMSc (Netherlands)  "Untire": a digital help to conquer cancer-related fatigue Maaike Brugmans, PT, MSc (Netherlands)  Panel discussion  8. Selected poster presentations (15 min each) Introduction  Slot 1 (15:35 - 15:50) PERCS per physiotherapy-led clinic Louise Brennan, PT, PhD (Ireland)  Slot 2 (15:50 - 16:05) Agreement between a mobile app and face-to-face middation study Carolina Fernández Lao, PT, PhD (Spain)  Slot 3 (16:05 - 16:20) Balance impairments in pedilatric cancer Emily McCarthy, DPT (USA)  Slot 4 (16:20 - 16:35) Prehabilitation in esophageal cancer care: what moves the patient?
